HARDBOOT INSOLES

1. DryTek top sheet:

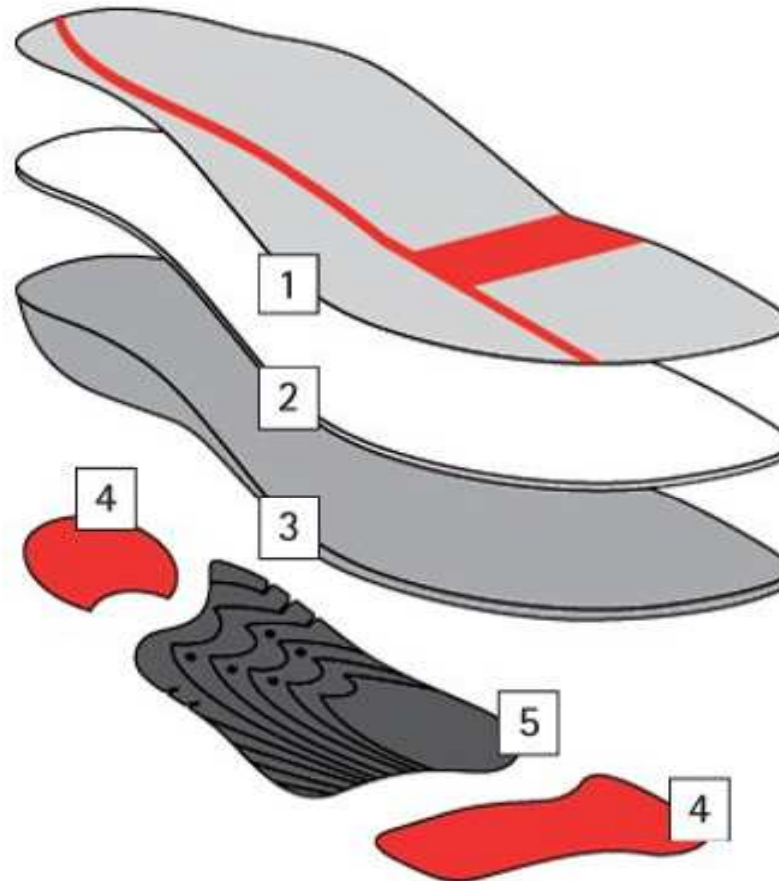

hard wearing and designed to wick moisture away from the skin.

2. Freeflex (mid layer):

memory foam impregnated with Bamboo charcoal: reduces odour, kills bacteria and controls humidity.

3. curEVA Tuff (EVA Rubber Compound):

full length primary shock absorption, incorporating the Autofit Heel Cup, designed to mould to your heel and reduce motion.

4. Poron:

secondary heel and metatarsal protection.

5. Dynamic Arch Cradle:

available in 3 key arch heights – low, medium and high. Stabilises and aligns the foot, distributing pressure evenly throughout the foot. Supports and cushions impact.
