

## technologies PROACTIVE INSOLES

**1. DryTek top sheet:**  
hard wearing and designed to wick moisture away from the skin.

**2. Freeflex (mid layer):**  
memory foam impregnated with Bamboo charcoal: reduces odour, kills bacteria and controls humidity.

**3. curEVA (EVA Rubber Compound):**  
full length primary shock absorption, incorporating the AutoFit Heel Cup, designed to mould to your heel and reduce motion.

**4. Poron:**  
secondary heel and metatarsal protection.

**5. Dynamic Arch Cradle:**  
available in 3 key arch heights – low, medium and high. Guides and propels the foot. Supports and cushions impact, captures and returns energy for propulsion.

Constructed with softer cradle and EVA than [Hardboot insole](#)
